

Tyre inflation systems

Air supply system K3000 (3,200 l/min)

The hydraulically driven compressor K3000 is primarily used in cases where the number and size of tyres requires a significant amount of air and/or where tyres need to be inflated quickly (e.g. tandem and tridem manure spreaders used by agricultural service providers).

Technical data:

Piston compressor with 4 cylinders, p_{max}: 7.5 bar

Effective air flow: 3,200 l/min at 2 bar back pressure

Maximum speed: 1,100 rpm (may require hydraulic safety device)

Oil fill capacity: 5 l

Oil consumption of hydraulic motor: approx. 80 l/min
